SB13 - TRANSPORT

Flexible and secure transport

Our specially developed and user-friendly mobile SECURITBOX trailer enables you to transport your Securitboxes effortlessly to the desired location. The trailer is available in versions for one or two boxes and can be easily attached to cars or vans.

This innovative transport concept is made of robust, hot-dip galvanised metal and is based on a European chassis with integrated brakes, which guarantees maximum safety and durability. The trailer is approved for use in all European countries and offers an ideal solution for Securitbox owners who require flexibility and mobility.

Naturally, the trailer is CE-certified and comes with an EC Declaration of Conformity, so it fulfils all relevant safety and quality standards. An indispensable tool for getting your security solutions to where they are needed quickly and reliably.

Mobile security, redefined
