

## SB 13 & SB20- Transport Trailer

With this specially developed and user-friendly mobile SECURITBOX trailer, you can transport any of the Securitboxes to the desired location.

We have the trailer for one or two box variants in our range. It can be attached to cars and vans.

The transporter is a unique transport concept, realized in hot-dip galvanized metal on a European chassis with brakes.

This trailer is suitable for all European countries and is an indispensable tool for all Securitbox owners.

It is of course CE-certified and has an EC declaration of conformity.
