MOBILE CAMERA & LIGHT MASTS

SB4-MINI

The SB4-Mini from the Securitbox series is a completely new concept.

The compact series remains true to the lines of the SB6-Pro. The advantages of the SB4-Mini lie in its space-saving design: two units can be transported simultaneously with a single trailer (model SB13).

The SB4-Mini can be extended up to a height of 4.20 metres. There is a hexagonal camera mounting insert at the top of the mast.

The SB4-Mini has two doors and is equipped with pallet truck and forklift pockets on both sides, making it easy to transport.

It can also be easily lifted with a crane thanks to four lifting eyes.

Mobile security redefined
