MOBILE CAMERA & LIGHT MASTS

SB6- EASY

Our SB 6 - Easy video tower offers a flexible, ready-to-use solution for protecting and housing your surveillance technology. The tower has two lockable doors that ensure secure access to the installed devices, while the open roof allows for quick and easy installation. Thanks to this design, the video tower can be up and running in no time at all.

The Securitbox - Easy can be used universally and is suitable for devices from all manufacturers. With its generous storage space, the tower offers sufficient room for electronic devices such as cameras, network technology and other security components.

A special feature of all our models, including the SB 6 - Easy, is the integrated climb-over protection. This provides additional security by preventing unauthorised access to the tower by climbing.

Mobile security, redefined
