

## CONTROL CABINETS FOR MOBILE SECURITY

# SBT- V1

**Control cabinets from our own production – robust and individually adaptable**

Our control cabinets are made of high-quality steel and powder-coated in RAL 7016 (anthracite gray) to ensure optimal protection and a long-lasting surface. All electrical cabinets are manufactured according to current VDE and DIN standards and are equipped with the latest technologies.

The control cabinets are already fully equipped with all the necessary components, so you only need to integrate your own video technology and, if necessary, loudspeakers and IP lighting. Alternatively, we also offer you the option of having the entire installation carried out by our experienced team.

On request, we are happy to manufacture customized control cabinets according to your specific requirements. Talk to us or contact your specialist dealer to find out more about our customized solutions.

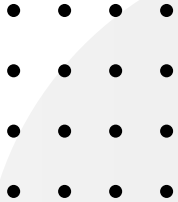

*Mobile security, redefined*
